Aberdeen Climate Action

Role: Climate Café Team Member

Time commitment	Support	How to apply
Flexible, with a regular commitment around the monthly Climate Café. Some preparation before each event and support on the day needed.	You will be supported by the Climate Café Team and Team lead. Tasks can be shared across the team.	Fill in our online form, or email us at info@aberdeenclimateaction.org

Description:

As a Climate Café Team Member with Aberdeen Climate Action (ACA), you'll be part of the friendly team in charge of our main activity, Climate Cafés. They bring local people, experts and other organisations together to open conversations about the climate. It's a chance to meet people across Aberdeen who care about the same things you do.

How does the role help ACA?

The Climate Café team organises ACA's regular Climate Cafés: friendly, community-focused events where people can learn about a climate-related topic, ask questions and share ideas. Team members help make these events welcoming, informative and well organised.

What does the role involve?

- Help develop ideas and themes for Climate Cafés, and find and contact relevant speakers or organisations.
- Help organise the practical arrangements for each Café, including venue, Zoom and materials.
- Help promote Climate Cafés through ACA's communication channels and local networks.
- Help welcome participants, support the Café on the day and facilitate discussion and questions where appropriate.
- Help with follow-up, feedback and ideas for future cafés.
- Take on tasks according to your interests, availability and the needs of the team.

Skills/experience needed for this role

- Interested in climate issues, community engagement and creating inclusive, accessible discussions.
- Friendly, approachable and comfortable welcoming people and communicating with speakers, participants and other volunteers.
- Organised and able to follow through on agreed tasks.
- Happy working as part of a small team and taking initiative when needed.
- Previous event or facilitation experience is useful but not essential.
